GALANT series gives you more flexibility in desk design. Here are most of the popular table combinations, but if you want something different, feel free to create your own GALANT solution. Just follow the steps below to discover hundreds of new possibilities.

### 1. Choose a basic table top to use on its own

or complement it with add-on tops, to get the size and shape you want

### 2. Choose the color

The desktops are ¾" thick, clear lacquered wood veneer with solid wood edging or white melamine with polypropylene edging. The beech veneer has tinted clear lacquer or is stained medium brown.

### 3. Choose the leg design

GALANT legs are made of silver or grey lacquered steel and have 4 different designs: A-legs with lockable castors (H28%), adjustable A-legs (H23%-35%) – suitable for large table combinations as they don't get in the way – and adjustable T-legs (H23%-32¼") with aluminum feet. If you want to vary your work position substantially, there is an electric height adjustable sit/stand frame (H26¼-48%).

## HOW TO BUILD YOUR EFFEKTIV STORAGE SOLUTIONS

Think about what you need to store and how much space you have. Start at the bottom ...

And work your way up! Add-on units come in two heights and two widths.

Then add doors, low or high, in a wide selection of colors and finishes.

You can also opt for drawer fronts, file fronts or lockable roll-fronts.

The finished product – to your design and exactly as you want it!

## IKEA QUALITY

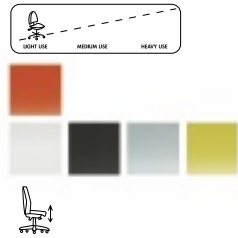

Although it might seem cruel, IKEA believes it is necessary to put these chairs through serious mistreatment before they can be approved for use in your workplace. One of the favorite methods of torture involves loading about 220lbs onto them 20,000 times. We also test the fabrics, to ensure they can withstand daily rigors.
