HOW TO CHOOSE

STEP 1: CHOOSE YOUR MATERIALS

Choose between spring and foam. All materials are safe and hygienic or course, and both sides of the mattress can be slept on, which prolongs the life of the mattress. If you are unsure which to choose ask what type of mattress do you prefer to sleep on?

Spring: VYSSA spring mattresses are made with either pocket springs or Bonell springs and have a protective wadding of foam and felt. The spring construction allows air to flow freely, promoting good air circulation and a favorable sleeping climate.

Foam: VYSSA foam mattresses use polyurethane foam. They are well fitting, durable and have pressure-relieving qualities that provide your growing child with good support and a favorable sleeping climate.

Covers: All VYSSA covers are removable and machine-washable to create a hygienic sleeping environment for your child. They are also well ventilated to allow for better air circulation. Some VYSSA mattresses have jersey and velour covers for a softer feeling.

STEP 2: IDENTIFY INDIVIDUAL NEEDS

Size

Are you buying a mattress for a children's bed or an extendable bed? All VYSSA mattresses are available in both sizes. As the extendable bed "grows" with the child in three steps, the mattress comes in three pieces; just add on a part when you extend the bed.

Time

How many years do you think your child will use the mattress? If you want to use the same mattress from the early years and well into childhood, a thicker and more durable mattress will provide better support as the child grows.

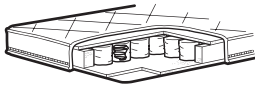

Pressure relief

All VYSSA mattresses provide pressure relief, but pocket springs provide more precise support for your child's fast growing body.
