

Instruction for creating and print the hang tag:

- Create hang tag as specified above with the dimensions. Use the cardboard specified in the Pack requirement.
- Print the frontside of the hang tag according to the item label that is connected in PDOC.
- Punch the hole according to above template.
- Placement of date stamp as above template.
- Attachment of the hang tag on product is specified in Pack requirement.

Instruction for printing the backside with the local label text for the AP article numbers:

- Use the finalized and approved CN label that is connected in PDOC and merge it according to below example. It should fit into the dashed line box on template, by using the font size stated below. It is **important** that all information from the CN label is following to the printed label. It is possible to merge the different section in the CN label to have fewer lines, but each section need to be divided with semicolon(;).
- Do the same with the JP label.
- Add the AA number into respective dash box shown below.

Font size:
5,8points = 2,05mm
Font CN:
YaHei
Font JP:
Meiryō
