

ROMÂNĂ

Curăță cu o cârpă înmuiată în apă și detergent delicat, neabraziv, sau săpun, dacă este necesar. Șterge cu o cârpă uscată.

Cum să folosești produse cu folie de protecție

- Înainte de asamblare, scoate folia de protecție de pe margini și alte suprafețe care pot interfera cu asamblarea.
- Lasă restul foliei de protecție pentru a evita deteriorarea în timpul asamblării. După asamblare, scoate toată folia de protecție.
- Notă - suprafețele pot fi foarte sensibile la zgârieturi imediat după eliminarea foliei de protecție.
- Pentru a îmbunătăți rezistența la zgârieturi, șterge suprafețele cu o soluție de detergent delicat (max. 1%, fără alcool sau substanțe abrazive).

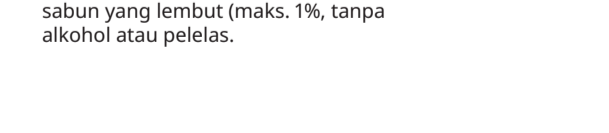

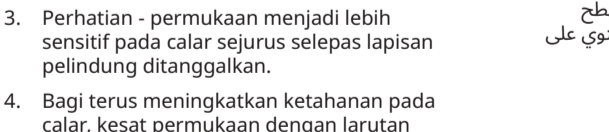

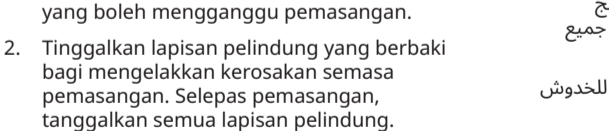

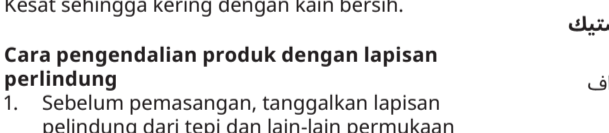

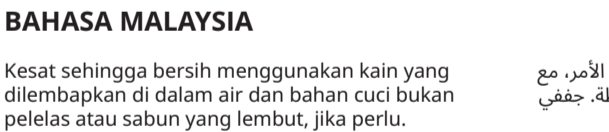

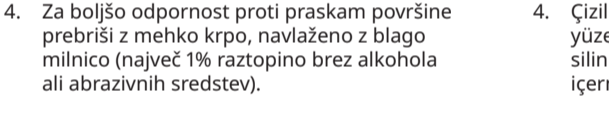

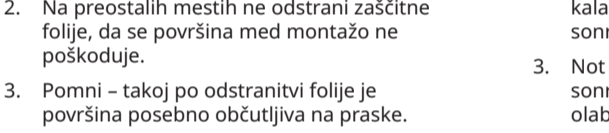

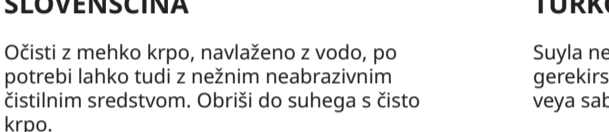

SLOVENSKY

V prípade potreby utrite mäkkou handričkou namočenou vo vode a jemným neabrazívnym čistiacim prostriedkom na umývanie riadu alebo mydlom. Utrite do sucha čistou handričkou

Ako zaobchádzať s výrobkami s ochrannou fóliou

- Pred montážou odstráňte ochranný film z hrán a iných povrchov, ktoré by mohli byť montážou prekryté.
- Zostávajúcu ochrannú fóliu ponechajte, aby sa pri montáži výrobok nepoškodil. Po montáži zvyšok ochrannej fólie odstráňte.
- Pozor, povrchy môžu byť okamžite po odstránení ochrannej fólie mimoriadne citlivé na poškriabanie.
- Aby ste zlepšili ich odolnosť proti poškriabaniu, utrite povrchy jemným mydlovým roztokom (max. 1%, bez alkoholu alebo drsných čistočiek).

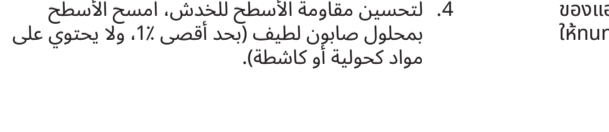

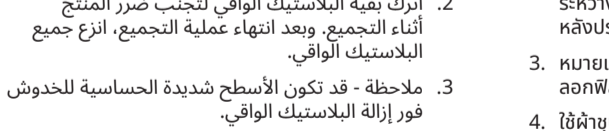

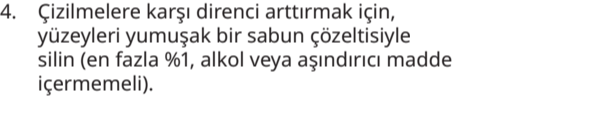

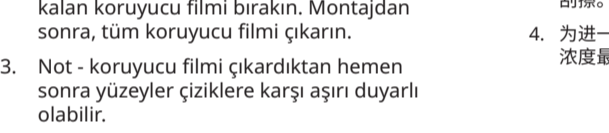

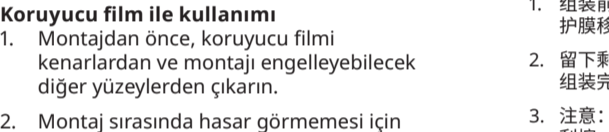

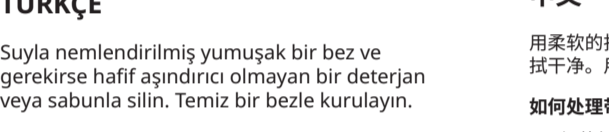

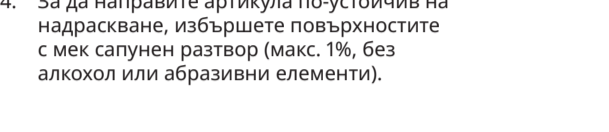

БЪЛГАРСКИ

Ако е необходимо, почистете с кърпа навлажнена с вода и мек неабразивен препарат или сапун. После подсушете с чиста кърпа.

Работа с продукти покрити с предпазно фолио

- Преди да започнете сглобяването премахнете предпазното фолио от ълите и от други повърхност, ако пречат на сглобяването.
- Оставете останалото предпазно фолио с цел защита от щети по време на сглобяването. Премахнете изцяло предпазното фолио след като сте приключили със сглобяването.
- Забелжка - след като премахнете предпазното фолио някои повърхности могат да бъдат по-уязвими на надраскване.
- За да направите артикула по-устойчив на надраскване, избършете повърхностите с мек сапунен разтвор (макс. 1%, без алкохол или абразивни елементи).

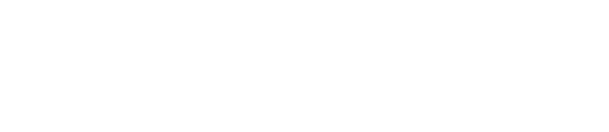

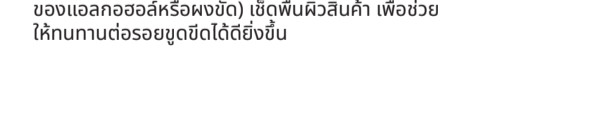

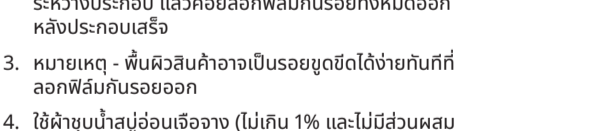

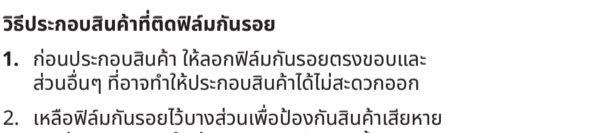

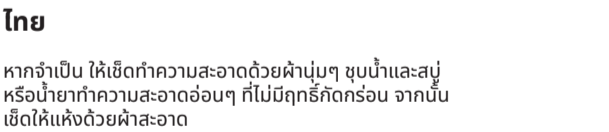

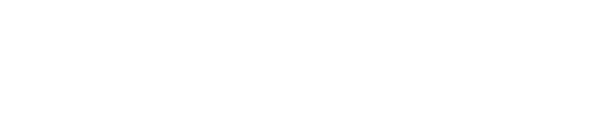

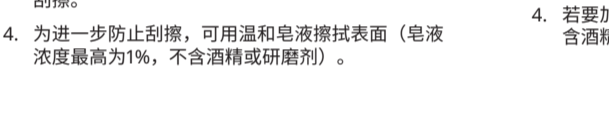

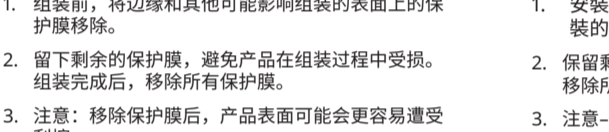

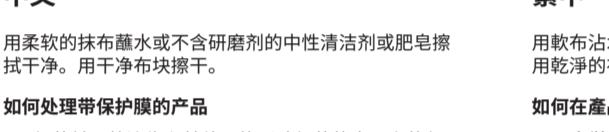

HRVATSKI

Očistiti krpom natopljenom u blagi deterđzent za pranje ili sapun, po potrebi. Osušiti čistom krpom.

Kako rukovati proizvodima sa zaštitnom folijom

- Prije sastavljanja, skinuti zaštitni sloj s rubova ili ostalih površina koje mogu smetati pri sastavljanju.
- Ostaviti preostalu foliju radi izbjegavanja oštećenja nastalih tijekom sastavljanja. Nakon sastavljanja, skinuti svu zaštitnu foliju.
- Napomena – police mogu biti dodatno osjetljive na ogrebotine odmah po skidanju zaštitnog sloja.
- Za povećavanje otpornosti na ogrebotine, prebriši površine blagom sapunskom otopinom (maks. 1 %, bez alkohola ili abraziva).

ΕΛΛΗΝΙΚΑ

Καθαρίστε με ένα μαλακό πανί μουσκεμένο σε νερό και ήπιο, μη διαβρωτικό απορροπαντικό ή σαπούνι, αν είναι απαραίτητο. Σκουπίστε με ένα καθαρό και στεγνό πανί.

Χρήση προϊόντων με την προστατευτική μεμβράνη

- Πριν τη συναρμολόγηση, αφαιρέστε την προστατευτική μεμβράνη από τις άκρες και από άλλες επιφάνειες που μπορεί να παρεμβαίνει στην συναρμολόγηση.
- Αφήστε την προστατευτική μεμβράνη που υπολείπεται για να προστατεύσετε την επιφάνεια κατά τη διάρκεια της συναρμολόγησης. Μετά την συναρμολόγηση αφαιρέστε όλη την μεμβράνη.
- Σημείωση-οι επιφάνειες μπορεί να είναι πολύ ευαίσθητες στις γρατσοειδές αμέσως μετά την αφαίρεση της μεμβράνης.
- Για να βελτιώσετε περισσότερο την αντοχή στις γρατσοειδές, καθαρίστε τις επιφάνειες με ένα ήπιο διάλυμα σαπουνιού (μέγ. 1%, χωρίς αλκοόλ ή διαλύτες).
